

Fixed Base Length Sky Screen Type 409

The SABRE Ballistics Fixed Base Length Sky Screen type 409 comprises two type 408 Sky Screens mounted and calibrated on a two metre beam.

A type 432 control unit is usually supplied also mounted on the beam and the following specification assumes this configuration. For other options contact sales office.

For further details of the Modular Sky Screen type 408 please refer to separate data sheet. When used indoors, two DC Light Units type 403 are also required. Optional accessories include cables, cable drum and sunshields.
