

Dual Channel Remote Control Unit Type 432

The **SABRE Ballistics** Dual Channel Remote Control Unit type 432 is designed for use with the Milligan type "E" and "H" (and the latest compatible Solid State Types) Sky Screens and Modular Sky Screens type 480, all manufactured by SABRE.

The Remote Control Unit allows remote sensitivity control, provides a TTL interface to chronometers such as the SABRE VFR type 421 and incorporates an LED activity indicator and full Sky Screen self test facility.

The unit is housed in a sealed diecast box and may be operated from 12v dc or optionally on ac mains supply.
