

Medium Calibre Test Gun A3 / B3

The **SABRE Ballistics** Medium Calibre Test Gun A3 / B3 comprises an extremely rugged breech housing with facilities to bolt in barrels for medium calibres from 30mm.

It is based on a strong enclosed breech housing. A lifting breech block with optional insulated firing pin or electrical firing contact is fitted as required.

This system allows the testing of ammunition for pressure, velocity and accuracy, optionally using either piezoelectric or copper crusher gauges.

The system offers safe, reliable operation when used as a test apparatus for ammunition and armour plate testing.

MULTI-CALIBRE FROM 30MM

SIMPLE TO OPERATE & MAINTAIN

ADJUSTABLE FOR AZIMUTH / ELEVATION

SAFE REMOTE FIRING

PERCUSSION OR ELECTRICAL FIRING

COST EFFECTIVE SYSTEM

RECOIL MOUNTED
