

Universal Range Table & Weapon Mounts

SABRE Ballistics have designed and manufactured a number of weapon mounts as well as a Universal Range Table and several stands for the SABRE Ballistics Test Gun system and Universal Weapon Rest. Professional weapon engineers having considerable experience in this field, are also available to discuss particular customer needs.

Universal Range Tables D5 & D6

The SABRE Ballistics Universal Range Table shown in the attached photograph is a D5 stand which can accommodate most types of weapon up to 30mm. It is adjustable for azimuth and elevation and has slots for captive bolts to allow universal fitting of weapons and/or recoil units. A similar but heavier duty D6 stand for up to 40mm is shown in the data sheet for the A3/B3 Test Gun.

Size & Weight: 1676 x 864 x 864mm. 1000 Kg.

Recoil Unit D4

This is a "vee bed" slide with hydraulic shock absorber and return units.

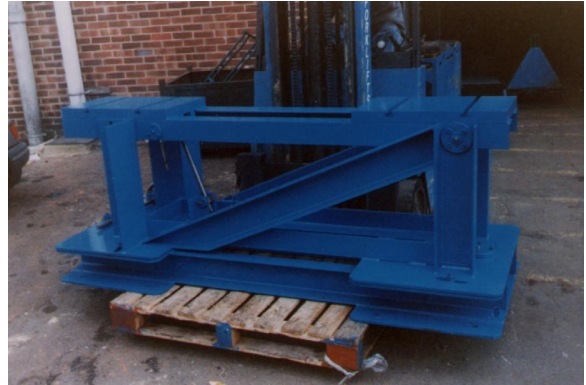

Size & Weight: 420 x 470 x 100mm. 30 Kg.

Stands D2 & D2.1

This stand is designed for the A1/B1 Test Gun and the Universal Weapon Rest, being suitable for small calibres up to 0.45" and 7.62mm. For additional stability, the base of the stand may be filled with sand or metal for absolute rigidity. Stand D2 includes azimuth and elevation adjustment for a Test Gun, D2.1 is the basic stand.

Optionally a jacking/trolley system is available for semi-mobile applications.

Size & Weight: 500 x 650 x 665mm. 40 Kg.

Stand D3

This stand is similar but heavier than the D2.1 stand above and is designed for the A2/B2 Test Gun, with or without Recoil Unit D4.

It is also able to accommodate the smaller A1/B1 Test Gun if required.

Size & Weight: 500 x 650 x 665mm. 70 Kg.

Please Note: For pictures of the D2.1 and D3 stands, please refer to the Small (A1/B1) and Medium Calibre Test Gun (A2/B2) data sheets
